

Cetrus Quarterly, August 2018

ABOUT CETRUS

We aim to provide the best software licensing and application use data, so you can make informed business decisions. Cetrus Process Meter (CPM) is an application management platform that provides real-time application use data.

DID YOU KNOW?

Cetrus Process Meter (CPM) tracks three different activity states of application use (Active, Inactive, and Timeout). This allows companies to more accurately determine their software needs. Optimize software by knowing exactly how many licenses to purchase.

CUSTOMER CORNER

Check out our new customers:

POPULOUS®

Populous is an international architecture and design firm that specializes in creating innovative sports stadiums all over the world.

CSO Architects

CSO Architects is based in Indianapolis and provides wide variety of service. They value integrity and focus on quality service.

NEW CONTENT

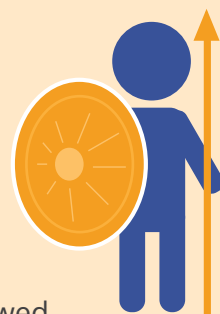

How to Save Money on Software Licensing - This e-book is a practical step-by-step guide to help you:

- Optimize your purchased licenses
- Reduce overhead and contain costs
- Improve business processes
- And more

COMING IN FALL

Application REStriCTOR (ARES) is a new Plug-in to the CPM Platform that allows you to contain your licensing costs. ARES restricts applications from launching if the current number of running applications exceeds the maximum number of applications allowed.

Waitlist is add-on feature to ARES that will be included in the next update. When an application is blocked through ARES, users can join a waitlist and be notified when the application is released.
