

CPMv4.0 IS NOW AVAILABLE!

On March 29, 2018 we released the Cetrus Process Meter v4.0 (CPMv4.0) platform. CPMv4.0 delivers a new architecture that allows us to more easily add functionality and Plug-ins in the future.

Key Benefits of CPMv4.0:

- Improved security of Manager and Agents
- Better monitoring and E2P with cached data and off-line recording
- Communicate from Website to Agents
- Enhanced reporting and analytic tools

CUSTOMER CORNER

We are excited to announce that we have some awesome new customers! Check them out:

MG2 is a top architecture and design firm, based in Seattle, WA. Cetrus saved MG2 over **\$107,000** in licensing costs! Learn more in the MG2 Case Study. 

Mahlum is an architecture and design firm based in Seattle, WA that focuses on community empowerment and sustainability.

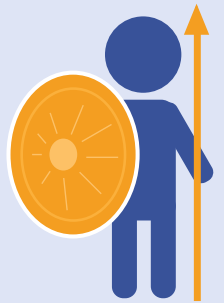

BSB Design is a quickly growing architecture, planning, and design firm that is headquartered in Des Moines, IA and has 11 offices nationwide.

COMING SOON

Application REStriCTOR (ARES)

is a new Plug-in to the CPM Platform that allows you to contain your licensing costs. ARES restricts applications from launching if the current number of running applications exceeds the maximum number of applications allowed.

Waitlist is an additional functionality feature to ARES that will be included in the next update. When an application is blocked through ARES, users can join a waitlist and be notified when the application is released.
