

PMv3.7 IS NOW AVAILABLE!

License tracking is better than ever with Process Meter v3.7 (PMv3.7). PMv3.7 creates the most detailed and complete view of your license use, so you can **reduce costs** and **maximize resources**.

PMv3.7 offers project association at the file level with our Expense-2-Project (E2P) plug-in. This allows you to bill for application use, thus **increasing profitability**. With analysis of the data, E2P allows you to improve your project management.

Explore new, dynamic reports that showcase your data for faster, easier, analysis. Screenshots and examples are available on our website.

See the full press release [HERE](#).

Your Key Benefits:

- See where you can reduce license costs
- Understand your license use and predict future needs
- Improve project management with project association
- Bill for application use with Expense-2-Project (E2P)

ABOUT CETRUS

We work to revolutionize the way companies make licensing decisions. Cetrus provides **real-time desktop application monitoring** through our innovative platform, Process Meter™ (PM).

COMING SOON

Process Meter v4.0 is just around the corner with a target release date at the end of March, 2018.

Major Improvements:

- Improved security of Manager and Agents
- Better monitoring and E2P with cached data and off-line recording
- Communicate from Website to Agents
- Enhanced reporting and analytic tools

As we get closer to the release, we will post more information and details about v4.0 on our [blog](#).
